GB0214 Series Ground Buss Bar Kits for Coaxial Cable Grounding Applications

1531 PR F

PRODUCT DESCRIPTION

GB-0214 Series Ground Buss Bar Kits provide a single, versatile solution to create a central ground point at your site. GB-0214 series ground buss bars are manufactured from 1/4" (6.4mm) thick solid copper and incorporate fifteen pairs of 7/16" holes. By slotting one hole in each pair of 7/16" holes, the ground buss bar accommodates any lug hole spacing from 3/4" to 1". Ground buss bar kits are available with or without attachment hardware and are also available with a tin plated finish.

TYPICAL APPLICATIONS

SPECIFICATIONS
