WANHO[®] Completes Relocation To Newly Expanded Value-Added Service and Fulfillment Center

CHESHIRE, CT USA – WANHO announces the completion of its relocation of their global headquarters and regional value-added fulfillment center into its newly expanded Cheshire, CT facility.

Dave Elliott, WANHO's President expressed, "I am extremely proud of the dedication and commitment demonstrated by all of our employees in executing the successful transition of our operation without a single missed commitment or disruption of service to any of our customers. Their ability to overcome the most challenging conditions including adverse weather, year-end processing, and the physical relocation of our operation during the Christmas and New Years holiday period, coupled with the positive uptick in order entry and expedite volume was truly extraordinary!"

WANHO will continue to maintain three primary locations in Connecticut to include its Knotter Drive location in Cheshire, and its Mattatuck Heights and Sharon Road locations in Waterbury.

The expansion of WANHO's Cheshire facility allows for all business management disciplines including finance, sales, marketing, customer service, product line, engineering, P&IC and quality assurance to be positioned side-by-side with our full range of value-added assembly, packaging, material sourcing and fulfillment operations; optimizing the efficiency and execution of its daily business through a seamless flow of end-to-end processes between each department.

100% of WANHO's US manufacturing capability will remain at its Sharon Road Facility, where they are currently expanding their local production capabilities to accommodate the manufacturing of four new products within its expanded "NexGen" portfolio. Dave Elliott further added, "as a result of our strong growth and expanding fulfillment capabilities, our Mattatuck Heights facility has in turn been reorganized for internal use to increase the capacity requirements of our warehousing and bulk storage requirements.

About WANHO:

WANHO is a wholly owned subsidiary of US Capital Resources, LLC and a world leader in today's industry combining core in-house manufacturing expertise and an extensive portfolio of innovative products and value-added capabilities, with its global platform of vertically integrated sourcing options to provide an enhanced level of material fulfillment solutions. In addition to being the leading supplier of turnkey sourcing solutions to many tier-one equipment manufacturers throughout the telecommunication sector, WANHO is a recognized supplier of precision components to the automotive, aerospace, hardware, industrial, medical and security industries with manufacturing, assembly and fulfillment operations in the United States, Europe and Asia.
